Colombia, one of South America's oldest, middle-income democracies, has developed rapidly despite a fifty-year "simmering" civil war and increasing levels of urban and rural crime and violence. In the past decade, however, the scale and intensity of violence has changed from a marginal conflict to generalized violence that now dominates the daily lives of most citizens. As remote guerilla activity has turned into country-wide "war," bringing in paramilitary groups, drug cartels, and other social actors, so too the causes of violence have changed. These have included both external events such as the collapse of the Cold War, as well as internal changes relating to economic liberalization, coal and oil developments and the impact of the global trade in illicit narcotics. Violence in Colombia is highly complex not only because of the different categories, but also due to its multiple causes. This paper combines disparate existing theories to develop an integrated framework that identifies four different levels of causality: structural, institutional, interpersonal, and individual. It recognizes the mutually reinforcing role played by factors at different levels of causality. Underlying the causes of violence in Colombia is minimal state presence in many parts of the country, widespread corruption and impunity, high levels of societal acceptance of violence, and a regionally fragmented country.

Even before the heyday of Von Dutch and Big Daddy, the ultimate way to personalize your car or motorcycle was to lay some wicked lines on top of the paintwork. Done with a steady hand and an eye for style, pinstripes speak volumes. In *How to Pinstripe*, acclaimed veteran striper Alan Johnson teaches you everything you need to know to get started, to further your mastery of the form, or to simply understand how a good design comes together. Following a primer on the history and evolution of pinstriping, this book launches into a step-by-step guide to the pinstriping process--from choosing paint

and brushes that suit your style and abilities, to preparing surfaces, experimenting with symmetrical and asymmetrical designs, striping freehand, and using grids and patterns. While stressing the importance of finding your own style and having fun with the hobby, Johnson also explains the basics of color theory and unique considerations for antique and classic cars, hot rods and customs, and motorcycles. For more advanced pinstripers, there's also tried-and-true advice on apprenticing and working car shows. Illustrated with color photography throughout, *How to Pinstripe* is the perfect source for beginners and veterans alike.

Oscar Wilde once wrote that, "Life imitates Art far more than Art imitates Life." And that is just what you'll find in this delightful collection of autobiographical and fiction stories from Ginny Graham. When you step into her world you'll find that her real life experiences are just as interesting, just as surprising, and just as charming as her fiction. Ginny claims that her mission in life is to have fun, and that's just what this book brings to its readers. The first part includes entertaining, sometimes hilarious stories from Ginny's experiences as an actress, mother of eight, foster parent and wife of the love of her life. The second, a sampling of her "happily ever after" fiction that leaves you feeling hopeful that everything really does have a way of working out in the end.
