symposium addressed several leading areas related to the development and use of novel bioceramics, including advanced processing of bioceramics; biomineralization and tissue-material interactions; bioinspired and biomimetic ceramics; ceramics for drug delivery; ceramic biosensors; in vitro and in vivo characterization of bioceramics; mechanical properties of bioceramics; and nanostructured bioceramics. The “ Porous Ceramics ” symposium aimed to bring ...

The link between porous ceramics and bioceramics is very strong, as several biological applications of ceramics require the presence of specific amounts of porosity, which are achieved by carefully controlled processing. Therefore, a joint session was held gathering the participants to both symposia (Bioceramics and Porous
