the main drama of the film. This study guide is not aimed at a film studies audience, and only touches on the Apollo 13 mission in a very broad context. It is aimed primarily at teachers of General Studies at A' level, and provides resource material in three main areas. First, it looks at

INTRODUCTION FOR TEACHERS - Film Education

Introducing Sabrina Justison's Apollo 13 Cinema Study Guide, for literature learning using the medium of movies! Cinema Studies for Literature Learning is geared to the visual learner in high school, to those who are reluctant readers or for whom reading is very time-consuming, and to those who love movies! Good movies tell good stories, and good storytelling requires the use of traditionally respected literary devices and techniques.

Apollo 13 Cinema Study Guide - 7sistershomeschool.com

Apollo 13 is a film about the United States third mission to land on the moon. The spacecraft of three astronauts suffers an unexpected explosion that causes their oxygen and power supply to slowly deplete. This explosion causes them to abort their mission to land on the moon and focus solely on getting back to earth alive.

Chapter 2/ Apollo 13 Movie Study Guide Flashcards | Quizlet

Based on the true story of the ill-fated 13th Apollo mission bound for the moon. Astronauts Lovell, Haise and Swigert were scheduled to fly Apollo 14, but are moved up to 13. It's 1970, and The US has already achieved their lunar landing goal, so there's little interest in this "routine" flight.. until that is, things go very wrong, and prospects of a safe return fade.

Apollo 13 (1995) - IMDb

Apollo 13 is a 1995 American space docudrama film directed by Ron Howard and starring Tom Hanks, Kevin Bacon, Bill Paxton, Ed Harris and Gary Sinise. The screenplay by William Broyles Jr. and Al Reinert dramatizes the aborted 1970 Apollo 13 lunar mission and is an adaptation of the 1994 book *Lost Moon: The Perilous Voyage of Apollo 13*, by astronaut Jim Lovell and Jeffrey Kluger.

Read Online Apollo 13 Movie Answer Guide short answers, allow 5-10 minutes for each essay question at the end of the film. On average, this movie guide will require about 45-60 minutes in addition to the length of the movie.

This exciting second book in the Lost series tells the incredible true story of the doomed Apollo 13 moon mission that nearly ended in disaster.

This memoir of a veteran NASA flight director tells riveting stories from the early days of the Mercury program through Apollo 11 (the moon landing) and Apollo 13, for both of which Kranz was flight director. Gene Kranz was present at the creation of America's manned space program and was a key player in it for three decades. As a flight director in NASA's Mission Control, Kranz witnessed firsthand the making of history. He participated in the space program from the early days of the Mercury program to the last Apollo mission, and beyond. He endured the disastrous first years when rockets blew up and the United States seemed to fall further behind the Soviet Union in the space race. He helped to launch Alan Shepard and John Glenn, then assumed the flight director's role in the Gemini program, which he guided to fruition. With his teammates, he accepted the challenge to carry out President John F. Kennedy's commitment to land a man on the Moon before the end of the 1960s. Kranz recounts these thrilling historic events and offers new information about the famous flights. What appeared as nearly flawless missions to the Moon were, in fact, a series of hair-raising near misses. When the space technology failed, as it sometimes did, the controllers' only recourse was to rely on their skills and those of their teammates. He reveals behind-the-scenes details to demonstrate the leadership, discipline, trust, and teamwork that made the space program a success. A fascinating firsthand account by a veteran mission controller of one of America's greatest achievements, *Failure is Not an Option* reflects on what has happened to the space program and offers his own bold suggestions about what we ought to be doing in space now.

They had the right stuff. They defied the prejudices of the time. And they blazed a trail for generations of women to follow. What does it take to be an astronaut? Excellence at flying, courage, intelligence, resistance to stress, top physical shape -- any checklist would include these. But when America created NASA in 1958, there was another unspoken rule: you had to be a man. Here is the tale of thirteen women who proved that they were not only as tough as the toughest man but also brave enough to challenge the government. They were blocked by prejudice, jealousy, and the scrawled note of one of the most powerful men in Washington. But even though the Mercury 13 women did not make it into space, they did not lose, for their example empowered young women to take their place in the sky, piloting jets and commanding space capsules. *ALMOST ASTRONAUTS* is the story of thirteen true pioneers of the space age. Back matter includes an author's note, an appendix, further reading, a bibliography, sources, source notes, and an index.

Recounts the four-day ordeal of Apollo 13 astronauts Jim Lovell, Fred Haise, and Jack Swigert and the dramatic struggle to bring back to Earth the tiny lunar module spacecraft into which they were forced to retreat when their main ship was damaged. Reprint.

The bold story of an African-American mathematician who worked for NASA during the space race and was depicted in the film "Hidden Figures," and how she made sure that the crew of Apollo 13 returned home. Full color.

The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968, NASA made a bold decision: in just sixteen weeks, the United States would launch humankind's first flight to the moon. Only the year before, three astronauts had burned to death in their spacecraft, and since then the Apollo program had suffered one setback after another. Meanwhile, the Russians were winning the space race, the Cold War was getting hotter by the month, and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken. But when Frank Borman, Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission, they instantly signed on. Written with all the color and verve of the best narrative non-fiction, *Apollo 8* takes us from Mission Control to the astronaut's homes, from the test labs to the launch pad. The race to prepare an untested rocket for an unprecedented journey paves the way for the hair-raising trip to the moon. Then, on Christmas Eve, a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit. And when the mission is over—after the first view of the far side of the moon, the first earth-rise, and the first re-entry through the earth's atmosphere following a flight to deep space—the impossible dream of walking on the moon suddenly seems within reach. The full story of Apollo 8 has never been told, and only Jeffrey Kluger—Jim Lovell's co-author on their bestselling book about Apollo 13—can do it justice. Here is the tale of a mission that was both a calculated risk and a wild crapshoot, a stirring account of how three American heroes forever changed our view of the home planet.

An authorized portrait of the first astronaut to set foot on the moon sheds light on other aspects of his career, from the honors he received as a naval aviator to the price he and his family paid for his professional dedication.

A visual history of 100 years of filmmaking in New York City, featuring exclusive interviews with NYC filmmakers Fun City Cinema gives readers an in-depth look at how the rise, fall, and resurrection of New York City was captured and chronicled in ten iconic Gotham films across ten decades: *The Jazz Singer* (1927), *King Kong* (1933), *The Naked City* (1948), *Sweet Smell of Success* (1957), *Midnight Cowboy* (1969), *Taxi Driver* (1976), *Wall Street* (1987), *Kids* (1995), *25th Hour* (2002), and *Frances Ha* (2012). A visual history of a great American city in flux, Fun City Cinema reveals how these classic films and legendary filmmakers took their inspiration from New York City's grittiness and splendor, creating what we can now view as "accidental documentaries" of the city's modes and moods. In addition to the extensively researched and reported text, the book includes both historical photographs and production materials, as well as still-frames, behind-the-scenes photos, posters, and original interviews with Noah Baumbach, Larry Clark, Greta Gerwig, Walter Hill, Jerry Schatzberg, Martin Scorsese, Susan Seidelman, Oliver Stone, and Jennifer Westfeldt. Extensive "Now Playing" sidebars spotlight a handful of each decade's additional films of note.

NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. "Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy."—Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis* By August 1968, the American space program was in danger of failing in its two most important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back

against the wall, NASA made an almost unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America’s greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who’d dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America’s finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. “*Rocket Men* is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book.”—The New York Times Book Review
