Wire sized in American Wire Gage (AWG) world doubles or halves in cross-section every three steps in wire gage. So, if one assigns 5A as a current limit for 22AWG wire, then a 19AWG wire should be good for 10A, a 16AWG wire should be good for 20. Not quite. Two features in physics define current rating of a wire: (1) tolerable voltage drop and (2)

Amazon.com: Aircraft Avionics Wiring Pin Out Installation ...

They may LOOK like 8 pin jacks but look closer. They are 8 position 4 pin. The ONLY reason they are made this way is so they can directly use the old Merlin wiring when a Merlin was replaced with a Partner. An 8 pin plug will fit but there are only 4 pins. You only use 2 pairs for each extension and a 6 position 4 pin plug.

Check your encoder, the 429 wiring from the encoder, all the way to the Garmin connector. Check the connector for bent or pushed back pins. Make sure the 429 line doesn't ring to ground. Remove the xpndr antenna and make sure the bonding is good and the antenna is in good shape. Megger the coax and inspect condition of the connectors (both ends).
