Until recently, the only option for instrument rating training in Europe was a full course requiring up to 200 hours of theoretical knowledge instruction, but the Enroute and Competency-Based Instrument ratings (for aeroplanes only) are a part of a new approach that is supposed to make instrument flying more accessible, because the original courses were designed as part of a commercial course and were necessarily intense. This book is for people who already hold an ICAO IR, and who can simply convert to the EASA version by completing the skill test and demonstrating to the examiner (during the skill test) an adequate knowledge of air law, meteorology and flight planning. It contains all the information needed to answer the examiner's questions, plus tip and tricks not usually taught on such a basic course.

Get ready to take flight as two certified flight instructors guide you through the pilot ratings as it is done in the real world, starting with Sport Pilot training, then Private Pilot, followed by the Instrument Rating, Commercial Pilot, and Air Transport Pilot. They cover the skills of flight, how to master Flight Simulator, and how to use the software as a learning tool towards your pilot ' s license. More advanced topics demonstrate how Flight Simulator X can be used as a continuing learning tool and how to simulate real-world emergencies.
