The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

Discover success in global business today with the most strategic approach to international business topics and unique coverage not found in other books. GLOBAL BUSINESS, 4th Edition, is the first global business book that answers the big question, What determines the success and failure of firms around the globe? Globally renowned scholar and author Mike Peng integrates both an institution-based view and resource-based view throughout every chapter, bringing an unparalleled continuity and strategic approach to the learning process. The book combines an inviting, conversational style with the latest research and examples that reflect the most recent global developments. A wealth of business cases from Mike Peng and other respected international experts delve into how companies throughout the world have expanded globally. All-new video cases that cover every chapter's opening case and closing case, world maps that connect geography and culture to business decisions, and unique global debate sections that draw you into cutting-edge international discussions help you learn to think independently and view business challenges from a truly global perspective. With GLOBAL BUSINESS, 4th Edition, you view business through the eyes of a true world citizen and gain the understanding you need to become an effective manager within today's global business landscape. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Over 630 million Chinese escaped poverty since the 1980s, the largest decrease in poverty in history. Studying 700 manufacturing firms in the Yangzi region, the authors argue that the engine of China's economic miracle—private enterprise—did not originate at the top but bubbled up from below, overcoming initial obstacles set up by the government.

This book introduces readers to the theory, design and applications of automotive transmissions. It covers multiple categories, e.g. AT, AMT, CVT, DCT and transmissions for electric vehicles, each of which has its own configuration and characteristics. In turn, the book addresses the effective design of transmission gear ratios, structures and control strategies, and other topics that will be of particular interest to graduate students, researchers and engineers. Moreover, it includes real-world solutions, simulation methods and testing procedures. Based on the author's extensive first-hand experience in the field, the book allows readers to gain a deeper understanding of vehicle transmissions.

This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

This edited volume brings together a group of expert contributors to explore the opportunities and the challenges that Industry 4.0 (smart manufacturing) is likely to pose for regions, firms and jobs in Europe. Drawing on theory and empirical cases, it considers emerging issues like servitization, new innovation models for local production systems and the increase in reshoring. Industry 4.0 and Regional Transformations captures the complexity of this new manufacturing model in an accessible way and considers its implications for the future. It will be essential reading for advanced students and researchers and policy makers in regional studies, industrial policy, economic geography, innovation studies, operations management and engineering.

This book is a printed edition of the Special Issue "Sustainable Business Models" that was published in Sustainability
