Co-written by author Dee Silverthorn, this student study guide is adapted from materials the author developed for her own class. Each chapter features a "guided note-taking" series of questions that allow students to learn the basics as they read. Assigning these questions as pre-class homework helps instructors free up class time for interactive learning activities. Other helpful study aids include try-it-yourself activities, quantitative and application-level review questions, chapter summaries, lab exercises, and reading lists.
