Iridology: What the eyes reveal - NZ Herald

An iris map showing one's own eyes through a mirror can be found in the back endpaper. RIGHT AND LEFT IRIS If you are right-handed, the right side of your body is going to get more wear and tear physically than the left side; so you would expect to see more evidence of physical problems in the right iris.

Iridology: How the Eyes Reveal Your Health and Your ...

What can your eyes reveal about your health? Iridology or iris diagnosis is a tool that many naturopaths employ to help evaluate their client's health. A torch and magnifying glass, or sometimes an iris camera, is used to take a close look at the iris - the blue, green or brown doughnut-shaped tissue in the eye.

The beginner's guide to iridology - bodyandsoulau

An Iridology exam analyzes the iris, or the colored portion, of the eye. The nerves that travel throughout the body and come up to the brain extend out, via the optic nerve, to reflect in the iris. Therefore, the colors, fiber structure, and other markings are actually providing nerve feedback from the whole body to indicate what weaknesses you've been predisposed to genetically.
