Reports - performance-based-road-contracts.com

Performance based contracting (PBC), also known as performance-based logistics (PBL) or performance-based acquisition, is a product support strategy used to achieve measurable supplier performance.A PBC approach focuses on developing strategic performance metrics and directly relating contracting payment to performance against these metrics. Common metrics include availability, reliability ...

Performance-based contracting - Wikipedia

Performance-based contractingis a form of contracting that explicitly includes three characteristics: • Clear definitionof a series of objectives and indicators by which to measure contractor performance • Collection of dataon the performance indicators to assess the extent to which the contractors are successfully implementing the defined services • Performance leading to consequencesfor the contractor, such as provision of rewards or imposition of sanctions.

What Is Performance-Based Contracting?

Performance-based service contracting (PBSC) emphasizes that all aspects of an acquisition be structured around the purpose of the work to be performed as opposed to the manner in which the work is to be performed or broad, imprecise statements of work which preclude an objective assessment of contractor performance.

Best Practices for Performance-Based Contracting | The ...

Performance based concept in the management of road maintenance and rehabilitation has been introduced in Brazil ten years ago, through the execution of the CREMA (contratos de reabilitacao e manutencao - Rehabilitation and Maintenance Contracts), under two World Bank-supported projects. The concept proved attractive and, as a result, spread progressively in the country, often with Bank support: by late 2008, more than 150 performance based contracts had been executed and close to 30,000 ...

(PDF) Performance-based Contracting for Roads ...

Output and performance based road contracting (OPRC) is an agreement between a government and a private contractor whereby the private contractor maintains the road to achieve specified standards for a certain period of time in return for a fixed payment for meeting specified performance indicators.

A Case Study on the Problems and Prospects of Output and ...

The traditional way of contracting out road maintenance is based on the amount of work being measured. PB road contracts define minimum conditions of road and assets. Payments are based on how well the contractor manages to comply with the performance standards defined in the contract, and not on the amount of works and services executed.

PERFORMANCE BASED SERVICE CONTRACTING

16.Output- and Performance-based Road Contracts transfer a significant burden of risk onto the contractor. It is important that this burden is both equitable and within the capacity of the industry. The contract defines the risk profile carried by the contractor arising from storm events, legislation changes, changes in traffic volumes, and roadside development.

SPD OPRC - World Bank

The basic difference is that under the Output- and Performance-based Road Contract, most of the payments to be made to the Contractor are not based on quantities of works measured by unit prices for works inputs, but on measured "outputs" reflecting the target conditions of the roads under contract (in other words: "what the roads are supposed to look like"), expressed through "Service Levels."

Sample Bidding Document - Request for Bids (RFB)- Works ...

Output and Performance-Based Road Contracts is the innovative method for the maintenance and management of roads ensuring efficient and effective delivery of maintenance service and maintenance of roads as assets.
