early primary years. The project, based on Howard Gardner's multiple intelligences theory and David Henry Feldman's nonuniversal development theory, emphasizes observing children closely, identifying children's areas of strength, and using those strengths as the basis for an individualized educational program.

Project Spectrum: Early Learning Activities combines Howard Gardner's intelligences with David Henry Feldman's idea that children need to be given a gradually and individually structured learning environments in each domain of learning.

~~Project Spectrum: Early Learning Activities, Project Zero ...~~

The goal of the project from 1984 to 1988 was to determine whether distinctive intellectual strengths could be identified and assessed in children as young as four years old. Spectrum researchers designed assessment activities in seven different domains of knowledge: language, math, music, art, social understanding, science, and
