Work more effectively and get hands-on experience with this Laboratory Manual! Designed to accompany Snyder's The Extraordinary Chemistry of Ordinary Things, 4th Edition, this lab manual contains twenty-five laboratory exercises, all written in a clear, concise, and unimintimidating fashion. The themes emphasized closely parallel those of the text, incorporating experiments with both consumer and environmental applications. Snyder's The Extraordinary Chemistry of Ordinary Things, 4th Edition is known in the market for its strong consumer emphasis in which it takes a unique approach by using consumer products to illustrate chemical principles. Each area – chemistry and consumerism – reinforces the other in examinations of gasoline and petroleum, detergents, foods and food additives, plastics, and more.

Using ordinary and several not so ordinary products as examples, this book explores the chemical principles behind them to show how chemistry affects our daily lives. It includes an environmental chapter that focuses on pollution and its effects. It also examines how these chemical principles affect our lives on a larger scale.

As energy crises, environmental mismanagement, and disease outbreaks increase in our world, an understanding of biology is becoming more important than ever. These laboratory exercises give readers a greater understanding of themselves and of current issues in a biological context. Explores the natural world through Web-based exercises and inquiry-based investigation. Focuses on the scientific method and on science as a process. Features end-of-chapter Web exercises. References other human endeavors such as art, literature, and history. Offers a new exercise in human evolution incorporating recent paleontological discoveries. Presents more information on various animal groups. Approximately 10% of problems revised and rewritten for greater clarity and less redundancy. A useful source for science teachers (grades 7-12) and for anyone interested in learning more about biology.
