What Is a Financial System? 2.2 A financial system consists of institutional units1 and markets that interact, typically in a com-plex manner, for the purpose of mobilizing funds for investment and providing facilities, including payment systems, for the financing of commercial activity. The role of financial institutions within the system is pri-

### 2-Overview of the Financial System

Finance is the answer to that problem. If you think of the economy as a body, finance would be the heart, pumping money from pension funds in Iowa to construction sites in Madrid. In economic terms, the financial system is responsible for a lot of the world 's resource allocation. It decides which investments get funded and which ones do not.
