Understanding confounding variables. Published on May 29, 2020 by Lauren Thomas. Revised on July 3, 2020.

In research that investigates a potential cause-and-effect relationship, a confounding variable is an unmeasured third variable that influences both the supposed cause and the supposed effect.. It ' s important to consider potential confounding variables and account for them in your ...

Adair 6

Confounding, sometimes referred to as confounding bias, is mostly described as a ‘ mixing ’ or ‘ blurring ’ of effects. 1 It occurs when an investigator tries to determine the effect of an exposure on the occurrence of a disease (or other outcome), but then actually measures the effect of another factor, a confounding variable. As most medical studies attempt to investigate disease etiology and causal relationships, confounding is regarded as undesirable, as it obscures the ‘ real ...

(outcome). Because of the dual association, the confounding variable creates a false association between the risk factor and disease or can exaggerate or hide a true association.

~~Confounding Flashcards | Quizlet~~

Drawback: Case-control studies are feasible only when it is easy to find controls, i.e. persons whose status vis-à-vis all known potential confounding factors is the same as that of the case's patient: Suppose a case-control study attempts to find the cause of a given disease in a person who is 1) 45 years old, 2) African-American, 3) from ...
