Butylated hydroxyanisole and butylated hydroxytoluene are used extensively as food antioxidants. It is estimated that man consumes ca. 0.1 mg/kg body wt daily of these antioxidants. At levels 500 times this level (50 mg/kg/day), both butylated hydroxyanisole and butylated hydroxytoluene appear to be free of any obviously injurious effects. However, at larger doses (500 mg/kg/day), both ...

TOXICOLOGY AND APPLIED PHARMACOLOGY 21, 102-111 (1972) Toxicology, Metabolism, and Biochemistry of 1,2-Propanediol JOSEPH A. RUDDICK Food and Drug Directorate, Tunney's Pasture, Ottawa KIA OL2, Ontario, Canada Received January 19, 1971 Toxicology, Metabolism, and Biochemistry of 1,2-Propanediol.

Toxicology, metabolism, and biochemistry of 1,2 ...

Toxicology, study of poisons and their effects, particularly on living systems. Because many substances are known to be poisonous to life (whether plant, animal, or microbial), toxicology is a broad field, overlapping with biochemistry, histology, pharmacology, pathology, and many other disciplines.

toxicology / Poisons, Effects on Living Systems ...

Toxicologists study the safety and biological effects of drugs, chemicals, agents, and other substances on living organisms. They develop methods to determine harmful effects, the dosages that cause those effects, and safe exposure limits. They may also investigate the relationship between dose and effect, which can be influenced by factors such as the dosing regimen (single large exposure vs. continuous smaller exposures), route of exposure (oral,
