Tropical House celebrates a growing trend toward stylish globalization in interior design. More than 25 stunning houses and condos in and around Manila, the Philippines, evoke a distinctive tropical-modern-fusion style that is gaining popularity around the world. All these fine residences comprise a synthesis of East-West trends and contemporary furnishings—as Filipino designers merge sleek modernist furniture with local designers' "soulful creations" in natural hardwoods and other tropical materials. Over 250 full-color photographs of outstanding Filipino residences will inspire readers with their diverse and contemporary looks. From vintage glamour to classic modern with bold artful accents, to the clean, glam look known as "contemporary chic," this design book showcases the myriad tastes of the Philippines.

The selection features modernist designs referred to as Zen or Minimalist; admires the modern Global Eclectics, those well-traveled collectors of beautiful objects from East and West; and celebrates the individualists who mix European furniture with acutely creative accents from local designers or who frame edgy artworks by Filipino artists with iconic design inspired by Japanese architecture. Such are the global interiors and architecture of today's tropical Asia.

"The Tropical House celebrates a growing trend toward stylish globalization in interior design. More than 25 stunning houses and condos comprise a synthesis of East-West trends and contemporary furnishings—as Filipino designers merge sleek modernist furniture with local designers' "soulful creations" in natural hardwoods and other tropical materials. Over 250 full-color photographs of outstanding Filipino residences will inspire readers with their diverse and contemporary looks. From vintage glamour to classic modern with bold artful accents, to the clean, glam look known as "contemporary chic," this book showcases the myriad tastes of the Philippines.

25 Tropical Houses in Indonesia offers a selection of the best contemporary architecture and interior design in the archipelago. Architects working in Indonesia—and elsewhere in Southeast Asia—face the challenge not only of creating spaces to suit the lifestyles of their users but also of addressing the environmental and climatic problems associated with living in the tropics. Featured in this book are twenty-five of the most innovative solutions to these challenges by some of Indonesia's foremost architects, among them Jeffrey Budiman and Andra Matin. Economic crises and political change within the country have inspired a new spirit of appreciation of modernist architecture and

fostered a wave of architectural creativity which is distinctly Indonesian, lively, and refreshing. Featured projects range from a new type of urban shop house to dramatic and flamboyant buildings emerging from the countryside. Drawing on classical Indonesian aesthetics and conventions and blending these with dynamic, cutting-edge design ideas, modern architecture in Indonesia has become dramatically aligned with international concepts of space, incorporating stunning local elements and materials.

This tropical design book showcases the innovative interior designs and architecture of The Philippines most luxurious homes. Start with a warm tropical climate. Add an abundance of exotic natural building material. And then let the cross currents of Asian design and aesthetics create a rich architectural alchemy of it's own. The result? The exquisite homes of the Philippines, a perfect balance of form and functionality, beautifully portrayed in Tropical Living. This Filipino design book presents over 30 of the latest homes in the archipelago: from a classic old-world penthouse in the art-deco Malate area to the creative homes of artists of Antipolo: from Asian-fusion villas on Batangas Bay to the elite Philippine Mediterranean manors of Forbes park, the book covers Filipino taste in all of its manifestations. With over 400 fabulous full-color photographs and texts from some of the country's leading architects and authors, there is also an inspirational sourcebook of contemporary tropical furnishings. It is a book of ideas to dip into, and savor.

After centuries of absorbing international influences, the architecture of the Philippines draws upon the Americas, Europe and Southeast Asia to create a style all its own. Adjusting these ideas to a tropical environment, Filipino designers have created a bold esthetic. Filipino Style gives an

# Get Free The Tropical House Cutting Edge Design In The Philippines

overview of the traditional Filipino house, the influence of foreign cultures, the environment's importance to home design, and finally the embrace of modernity. Insightful and beautifully photographed, Filipino Style provides wonderful design ideas from this lush island archipelago.

“A kaleidoscopic and evocative journey into deep time” (Andrea Wulf, author of *The Invention of Nature*), from the Ice Age to the first appearance of microbial life 550 million years ago, by a brilliant young paleobiologist “One of those rare books that’s both deeply informative and daringly imaginative.”—Elizabeth Kolbert, author of *Under a White Sky*

The past is past, but it does leave clues, and Thomas Halliday has used cutting-edge science to decipher them more completely than ever before. In *Otherlands*, Halliday makes sixteen fossil sites burst to life on the page. This book is an exploration of the Earth as it used to exist, the changes that have occurred during its history, and the ways that life has found to adapt—or not. It takes us from the savannahs of Pliocene Kenya to watch a python chase a group of australopithecines into an acacia tree; to a cliff overlooking the salt pans of the empty basin of what will be the Mediterranean Sea just as water from the Miocene Atlantic Ocean spills in; into the tropical forests of Eocene Antarctica; and under the shallow pools of Ediacaran Australia, where we glimpse the first microbial life. *Otherlands* also offers us a vast perspective on the current state of the planet. The thought that something as vast as the Great Barrier Reef, for example, with all its vibrant diversity, might one day soon be gone sounds improbable. But the fossil record shows us that this sort of wholesale change is not only possible but has repeatedly happened throughout Earth history. Even as he operates on this broad canvas, Halliday brings us up close to the intricate relationships that defined these lost worlds. In

novelistic prose that belies the breadth of his research, he illustrates how ecosystems are formed; how species die out and are replaced; and how species migrate, adapt, and collaborate. It is a breathtaking achievement: a surprisingly emotional narrative about the persistence of life, the fragility of seemingly permanent ecosystems, and the scope of deep time, all of which have something to tell us about our current crisis.

This Balinese design book, containing over 300 beautiful photos and extensive commentary will add a distinctive tropical flair to your interior decorating and architecture. The phenomenon loosely termed "Bali style" has been the subject matter for countless books on art, architecture, and interior design. In this book, author and architect Gianni Francione showcases the new generation of Bali-style homes, interiors, and artifacts that utilize what he terms a new internationalism. Even though the timeless, distinctive Balinese bale, open to a panorama of rice fields and the evening breeze, is still there, it may now be made in marble or stone. Similarly, present-day villas, resort bungalows, shops, restaurants, and other buildings are just as likely to use modernist techniques and materials as they are to utilize alang-alang and coconut wood. Bali Houses presents this new departure in architecture, interior design, glassware, table settings, textiles, furniture, and furnishings in many never-before-photographed locations. It is a fitting sequel to Bali Modern.

With over 350 vibrant photographs, extensive commentary and architectural plans, this architecture and design book showcases the modern luxury homes of Asia. The Sustainable Asian House celebrates modern architecture as an expression of environmental, social and cultural sustainability, as seen in some of the most breathtaking

# Get Free The Tropical House Cutting Edge Design In The Philippines

luxury homes in Southeast Asia. Gorgeous residences in Thailand, Malaysia, Singapore, Indonesia and the Philippines beautifully exemplify the trend towards sustainable architecture that engages with the natural world. The 27 houses featured in this fascinating and stunningly photographed architectural digest provide endless inspiration for architects, designers, builders and home buyers. The Sustainable Asian House illuminates the region's reinterpretation of tropical architecture and the growing interest in traditional materials and craftsmanship. There is a new emphasis on fresh air, natural light and spatial variety, reflecting the importance of well-being. Designers are considering issues such as orientation to the sun and prevailing winds to reduce energy consumption and carbon footprint. Instead of treating the tropical climate as something to overcome, the architects featured in this book present regional solutions on how to live appropriately in the contemporary tropical world.

Internationally renowned photographer and writer Tim Street-Porter has spent more than ten years travelling through Bali, Java, Sri Lanka, Mexico, Belize and Jamaica. This book's stunning photographs, supported by fascinating and informed commentary, capture the appeal of the enviable dwellings he found on his journeys.

25 Tropical Houses of the Philippines features top Filipino architects and designers with ideas that are stylish, contemporary, and show twenty-first century savvy. The Philippines has long been known for creative designs and furniture and for the skill of its artisans in crafting modern products from traditional materials. This book takes a giant step forward—into the realm of modern architecture and interior design. Twenty-five stunning homes showcase the

# Get Free The Tropical House Cutting Edge Design In The Philippines

best of residential design by a number of outstanding Filipino architects and designers. It offers a tour of stunning structures ranging from gracious pavilion-houses in elite subdivisions of Manila to elegant vacation homes of Batangas and Mindoro. Blending the graceful proportions of Asian design forms with the rigorous discipline and modernization of Western architecture, the houses retain an affinity with natural materials—warm hardwoods, rustic stone and slate, earthy clay and tile—at the same time introducing innovative use of glass, concrete, steel, and aluminum. Water elements and lush tropical gardens complete the transition from traditional conventions to Asian architectural fusion and international modernist trends.
